#### NOTES TO FORM PCT/ISA/220

These Notes are intended to give the basic instructions concerning the filing of amendments under Article 19. The Notes are based on the requirements of the Pattent Cooperation Treaty, the Regulations and the Administrative Instructions under that Treaty, in case of discrepancy between these Notes and those requirements, the latter are applicable. For more detailed information, sea slow the PCT Applicant's Guide, a publication of VIPD.

In these Notes, "Article", "Rule" and "Section" refer to the provisions of the PCT, the PCT Regulations and the PCT Administrative Instructions, respectively.

#### INSTRUCTIONS CONCERNING AMENDMENTS LINDER ARTICLE 19

The applicant has, after having received the international search report and the written opinion of the International Searching Authority, one opportunity to amend the claims of the international application. It should however be emphasized that, since all parts of the international application (claims, description and drawings) may be amended during the international preliminary examination procedure, there is usually no need to file amendments of the claims under Article 19 except where, e.g., the applicant wants the alter to be published for the purposes of provisional protection or has another reason for amending the claims before international publication. Furthermore, it should be emphasized that provisional protection is available in some States only (see PCT Applicants Guide, Volume I/A. Amerces BI and B2J.

The attention of the applicant is drawn to the fact that ammendments to the claims under Article 19 are not allowed where the international Searching Authority has declared, under Article 17(2), that no international search report would be established (see PCT Applicant's Guide, Online UA, paragraph 296).

#### What parts of the international application may be amended?

Under Article 19, only the claims may be amended.

During the international phase, the claims may also be amended (or further amended) under Article 34 before the International Preliminary Examining Authority. The description and drawings may only be amended under Article 34 before the International Preliminary Examining Authority.

Upon entry into the national phase, all parts of the international application may be amended under Article 28 or, where applicable, Article 41.

When? Within 2 months from the date of transmittal of the international search report or 16 months from the priority date, whichever time limit expires later. It should be noted, however, that the amendments will be considered as having been received on time if they are received by the International Bureau after the expiration of the applicable time limit but before the completion of the technical preparations for international publication (Rule 46.1).

#### Where not to file the amendments?

The amendments may only be filed with the International Bureau and not with the receiving Office or the International Searching Authority (Rule 46.2).

Where a demand for international preliminary examination has been/is filed, see below.

How? Either by cancelling one or more entire claims, by adding one or more new claims or by amending the text of one or more of the claims as filed.

A replacement sheet must be submitted for each sheet of the claims which, on account of an amendment or amendments, differs from the sheet originally filed.

All the claims appearing on a replacement sheet must be numbered in Arabic numerals. Where a claim is cancelled, no renumbering of the other claims is required. In all cases where claims are renumbered, they must be renumbered consecutively (Section 2050b).

The amendments must be made in the language in which the international application is to be published.

#### What documents must/may accompany the amendments?

Letter (Section 205(b)):

The amendments must be submitted with a letter.

The letter will not be published with the international application and the amended claims. It should not be confused with the "Statement under Article 19(1)" (see below, under "Statement under Article 19(1)").

The letter must be in English or French, at the choice of the applicant. However, if the language of the international application is English, the letter must be in English; if the language of the international application is French, the letter must be in French.

#### NOTES TO FORM PCT/ISA/220 (continued)

The letter must indicate the differences between the claims as filed and the claims as amended. It must, in particular, indicate, in connection with each claim appearing in the international application (it being understood that identical indications concerning several claims may be grouped), whether

- (i) the claim is unchanged;
- (ii) the claim is cancelled;
- (iii) the claim is new;(iv) the claim replaces one or more claims as filed;
- (v) the claim is the result of the division of a claim as filed.

The following examples illustrate the manner in which amendments must be explained in the accompanying letter:

- [Where originally there were 48 claims and after amendment of some claims there are 51]:
   "Claims 1 to 29, 31, 32, 34, 35, 37 to 48 replaced by amended claims bearing the same numbers;
   claims 30, 33 and 36 unchanged; new claims 49 to 51 added."
- [Where originally there were 15 claims and after amendment of all claims there are 11]: "Claims 1 to 15 replaced by amended claims 1 to 11."
- [Where originally there were 14 claims and the amendments consist in cancelling some claims and in adding new claims!
  - "Claims 1 to 6 and 14 unchanged; claims 7 to 13 cancelled; new claims 15, 16 and 17 added." or "Claims 7 to 13 cancelled; new claims 15, 16 and 17 added; all other claims unchanged."
- 4. [Where various kinds of amendments are made]:
  - "Claims 1 10 unchanged; claims 11 to 13, 18 and 19 cancelled; claims 14, 15 and 16 replaced by amended claim 14; claim 17 subdivided into amended claims 15, 16 and 17; new claims 20 and 21 added."

#### "Statement under Article 19(1)" (Rule 46.4)

The amendments may be accompanied by a statement explaining the amendments and indicating any impact that such amendments might have on the description and the drawings (which cannot be amended under Article 1911).

The statement will be published with the international application and the amended claims. It must be in the language in which the international application is to be published. It must be brief, not exceeding 500 words if in English or if translated into English. It should not be confused with and does not replace the letter indicating the differences between the claims as filled and as amended. It must be filed on a separate sheet and must be indentified as such by a heading, preferably by using the words "Silvement under Article 19(1)."

It may not contain any disparaging comments on the international search report or the relevance of citations contained in that report. Reference to citations, relevant to a given claim, contained in the international search report may be made only in connection with an amendment of that claim.

#### Consequence if a demand for international preliminary examination has already been filed

If, at the time of filing any amendments and any accompanying statement, under Article 19, a demand for international preliminary examination has already been submitted, the applicant must preferably, at the time of filing the amendments (and any statement) with the International Bureau, also file with the International Preliminary Examining Authority a copy of such amendments (and on any statement) and, where required, a translation of such amendments from the procedure before that Authority (see Rules 55.3(a) and 62.2, first sentence). For further information, see the Notes to the demand from (PCT/TIPE/A/01).

If a demand for international preliminary examination is made, the written opinion of the International Searching Authority will, except in certain cases where the International Preliminary Examining, Authority did not act as International Searching Authority did not act as International Searching Authority and where it has notified the International Bureau under Rule 66.1 bis(b), be considered to be a written opinion of the International Preliminary Examining Authority. If a demand is made, the applicant may submit to the International Preliminary Examining Authority a reply to the written opinion together, where appropriate, with amendments before the expiration of 32 months from the date of mailing of Form PC/ITSA/220 or before the expiration of 22 months from the priority date, whichever expires later (Rule 43bi.1(c)).

#### Consequence with regard to translation of the international application for entry into the national phase

The applicant's attention is drawn to the fact that, upon entry into the national phase, a translation of the claims as amended under Article 19 may have to be furnished to the designated/elected Offices, instead of, or in addition to , the translation of the claims as filed.

For further details on the requirements of each designated/elected Office, see the PCT Applicant's Guide, Volume II

# \* Attention Copies of the documents cited in the international search report can be searched in the following Korean Intellectual Property Office English website for three months from the date of mailing of the international search report. http://www.kipo.go.kr/kpo/eng/ => Patent Search => PCT-Service ID : PCT international application number PW: VRH44FP4

## WRITTEN OPINION OF THE

International application No.

INTERNATIONAL SEARCHING AUTHORITY PCT/US2008/079736 Box No. I Basis of this opinion 1. With regard to the language, this opinion has been established on the basis of : the international application in the language in which it was filed a translation of the international application into , which is the language of a translation furnished for the purposes of international search (Rules 12.3(a) and 23.1(b)) This opinion has been established taking into account the rectification of an obvious mistake authorized by or notified to this Authority under Rule 91 (Rule 43bis.1(a)) 3. With regard to any nucleotide and/or amino acid sequence disclosed in the international application, this opinion has been established on the basis of: a. type of material a sequence listing table(s) related to the sequence listing b. format of material on paper in electronic form c. time of filing/furnishing contained in the international application as filed. filed together with the international application in electronic form. furnished subsequently to this Authority for the purposes of search, 4. In addition, in the case that more than one version or copy of a sequence listing and/or table relating thereto has been filed or furnished, the required statements that the information in the subsequent or additioanl copies is identical to that in the application as filed or does not go beyond the application as filed, as appropriate, were furnished. 5 Additional comments:

#### 2. Citations and explanations :

Reference is made to the following document.

D1: WO 2007/084995 A2

D2: US 2005/0119567 A1

D3: US 2006/0184048 A1

- D1 dicloses an apparatus for obtaining data for at least one portion within at least one luminal or hollow sample, comprising: a first optical arrangement configured to transceive at least one electromagnetic radiation to and from the at least one portion; a second arrangement including at least one non-inflatable portion which is configured to be actuated so as to position the first arrangement; a third arrangement at least partially enclosing the second arrangement, and capable of extending to a position spatially outside a periphery of the section of the first arrangement; and a fourth arrangement which is configured to be actuated so as to position the first arrangement at a predetermined location within the at least one luminal or hollow sample.
- D1 dicloses a guiding catheter comprising: an outer guide having a guide lumen and an annular balloon mounted to a distal end of the outer guide; and an inner guide movably disposed within the guide lumen of the outer guide, the inner guide comprising a fluted balloon mounted to a distal end of the inner guide. The guiding catheter selectably pressurizes and depressurizes the annular balloon to control occlusion of fluid flow relative to the annular balloon, and selectably pressurizes and depressurizes the fluted balloon independently of pressurizing and depressurizing the annular balloon to permit perfusion of fluid flow relative to the fluted balloon and control anchoring of the fluted balloon within a generally tubular structure.
- D1 dicloses a catheter having an arranement of a cone shape(Fig. 43B) corresponding to the third arrangement of the cone shape of this invention.

# WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

International application No.

PCT/US2008/079736

#### Supplemental Box

In case the space in any of the preceding boxes is not sufficient. Continuation of:

The invention as defined in Claims land 16 relate to an apparatus for obtaining data for at least one portion within at least one luminal or hollow sample, compring: a first optical arrangement; a second enclosing arrangement and at least ane third arrangement which is configured to be actuated so as to expand. However, compositions corresponding to claim 1 are disclosed in D1. D2 and D3, so claim 1 easily derived from said D1, D2 and D3 by a persin skilled in the art. Therefore, claim 1 is cinsidered to involve nevelity but not to inventive step under PCT Article 33(2),(3).

Claims 2-15 dependent on claim 1 and claims 17-20 dependent on claim 16, further include additional features by defining the detailed compositions of the referring claims. However, these detailed compositions can be easily derived from D1, D2 and D3 by a person skilled in the art, Therefore, claims 2-15 and claims 17-20 are considered to involve novelty but not to involve an inventive step under PCT Article 33(2),(3).

The inventions as defined in claims 1~20 are industrially applicable to meet the criteria of PCT Article 33(4).
